[CLICK HERE](#)

## Does it need ink? Is it battery-powered?

The Deluche Vision Marker uses oil-based ink and does not require batteries, compressed air or any external source of power to work.

## How many prints can one ink refill do?

Each pod has ink for 2,000 impressions. You can get the same amount of impressions with every 4 drops of ink refill.

## Where could I buy refill ink?

You can order online via [cncfactory.myshopify.com](http://cncfactory.myshopify.com) or calling 714-581-5999. Refills come in 2ml bottles that provide about 16,000 impressions.

## What materials can you print on?

The marker will imprint on melamine, wood, plastic, or steel.

## What colors are available?

Red, black, green, and UV ink are available.

## What is the actual size of the ink print?

Each tool will mark a 0.75" space.

A custom stamp could be ordered at 0.78"

## What words/symbols can it print? How big is the print?

You can print alphanumeric characters starting at 10pt.

You can see our current library [here](#)

## How do you remove it?

Wipe off with alcohol or acetone on plastic, steel or melamine.

For wood surfaces such as veneer, a light sanding is required.

## Can I have a custom stamp made?

Yes. Custom pods have an additional production lead time of 3 days.

Please call us at 714-581-5999 for custom orders.

## Do I have to buy the whole tool again for different stamps?

No, you can interchange different pods/stamps using the same tool.

Multiple tools are only needed if you plan to use more than one tool simultaneously.
